

Chlorofluorocarbons

Samuel Roberts and Paul Taylor

Verse 1

The Sun is a cauldron of blazing gas,
Providing us with light and heat.
But in its glow there are harmful UV rays,
So the ozone we must not mistreat.
Then holes start to appear,
Up in the stratosphere.
This is quite concerning,
UV light is burning,
What is causing damage up here?

Chorus

Chlorofluorocarbons!
Chlorofluorocarbons!
They are all causing the ozone to decay.
Refrigeration and insulation and aerosol spray.
Healing the ozone is the only way.
Let's make a difference and start today.

Verse 2

Along came the banning of CFCs,
The Montreal Protocol began.
But rescuing our planet was paramount,
So the project spread across the land.
Still holes start to appear,
Up in the stratosphere.
This is still concerning,
UV light still burning,
What is causing damage up here?

Chorus

Chlorofluorocarbons!

Chlorofluorocarbons!

They are all causing the ozone to decay. Refrigeration
and insulation and aerosol spray. Healing the ozone is
the only way.

Let's make a diff'rence and start today.

Bridge

The Antarctic is melting,

The ice will fade away.

Rising levels of water,

The Earth we won't betray.

Chorus

Chlorofluorocarbons!

Chlorofluorocarbons!

Part 1

They are all causing the ozone to decay.

Refrigeration and insulation and aerosol spray.

Healing the ozone is the only way.

Part 2

Chlorofluorocarbons!

Chlorofluorocarbons!

Chlorofluorocarbons!

(Together)

Let's make a diff'rence and start today.
