Out The Milky Way

Iain Gilmour

Verse 1

In nineteen seventy seven NASA launched me into space,
To see the planets, educate the human race.
Four decades later and my engine's going strong,
Nobody ever thought I would go for quite so long.
I'm seeing things that nobody has seen!

Chorus

I've flown past planet Mars,
Seen Jupiter's red spot.
I've flown through all of Saturn's rings.
Past Uranus and Neptune,
Never gonna stop.
I'm on my way, out the Milky Way.

Verse 2

Nothing that's made by man has gone as far as me,
It's like I'm living in a sci-fi fantasy.
I've left our solar system, now I'm in deep space,
I'm making history, hope that science can keep pace.
I'm seeing things that nobody has seen!

Chorus

I've flown past planet Mars,
Seen Jupiter's red spot.
I've flown through all of Saturn's rings.
Past Uranus and Neptune,
Never gonna stop.
I'm on my way, out the Milky Way.

Bridge

I'm on an interstellar run!
Look out new planets here I come!

Chorus

I've flown past planet Mars,
Seen Jupiter's red spot.
I've flown through all of Saturn's rings.
Past Uranus and Neptune,
Never gonna stop.
I'm on my way, out the Milky Way.
