

# Sea Level Hornpipe

Iain Gilmour

## Chorus

Living in a place such as the British Isles,  
Is a lot of fun and makes you laugh and smile.  
But the future's not as rosy as could be,  
There's a problem with the rising levels of the sea.  
Global warming means the planet's temp'rature's,  
Slowly climbing up and scientists are sure,  
That the impact on the world one day will be,  
Quite a problem with the rising levels of the sea.

## Verse 1

We should move away from fossil fuels,  
That keep producing CO2.  
Alternatives like wind and sun,  
Are better than for ev'ryone.

## Chorus

Living in a place such as the British Isles,  
Is a lot of fun and makes you laugh and smile.  
But the future's not as rosy as could be,  
There's a problem with the rising levels of the sea.  
Global warming means the planet's temp'rature's,  
Slowly climbing up and scientists are sure,  
That the impact on the world one day will be,  
Quite a problem with the rising levels of the sea.

## Verse 2

All the forests that would clean the air,  
Are disappearing ev'rywhere.  
Intensive farming is not smart,  
Makes too much methane when cows burp.
