

# The International Space Station

Francis O'Sullivan

## Verse 1

I thought that I saw a shooting star one night,  
It was shining in the sky up above me.  
But I found out later that the flying light,  
Was the I. S. S. moving through the sky.  
There are astronauts living up there all year round,  
Helping ev'ryone on Earth learn all about space.  
Rockets come to visit bringing food from the ground,  
And more people to start working in the sky.

## Chorus

The International Space Station spins round and round the Earth,  
With a crew of people from around the world.  
Learning new things ev'ry day,  
And having fun along the way,  
As they float around their home up in the sky.

## Verse 2

I kept on looking for that same little light,  
I waved as it passed up above me.  
And now I know that hidden out of sight,  
There is someone waving back down from the sky.

## Chorus

The International Space Station spins round and round the Earth,  
With a crew of people from around the world.  
Learning new things ev'ry day,  
And having fun along the way,  
As they float around their home up in the sky.
